

# Edward Nyakeruma

Nairobi, Kenya | [edward.isaboke@gmail.com](mailto:edward.isaboke@gmail.com) | [LinkedIn](#) | [GitHub](#)

## Professional Summary

---

Full-stack developer with 8 years of experience in system design, building scalable, regulatory-compliant web applications and RESTful APIs. Reduced latency by 30%, cut cloud costs by 20% and led cross-functional teams to deliver 4 systems serving 1,000+ users. Passionate about secure, performance-oriented architecture and emerging technologies.

## Technical Skills

---

**Languages:** JavaScript, PHP, Typescript, Python, SQL

**Frontend:** React, Angular, React Native, HTML/CSS

**Backend:** Node.js, Express, Laravel

**Databases:** MySQL, MongoDB

**DevOps:** Docker, Azure DevOps, GitHub Actions (CI/CD)

**Other:** Git, REST APIs, Agile (Scrum), Unit Testing, Performance Optimization

## Work Experience

---

### Popote Innovations Limited | Full-Stack Software Developer

October 2017 - Present

Led the end-to-end development of 4 mission critical web applications (Laravel/JavaScript/MySQL), serving 1,000+ users and processing thousands of transactions annually. They include:

- **Real-Time Tax Collection System** - Cut tax collection time by integrating a REST API with a government platform. Added real-time validation rules that reduced filing errors by 25% This was measured by the rejection rate.
- **Customer Relationship Management System** - Boosted customer onboarding by 40%. Achieved by automating leads assignment and building a mass messaging module (email/SMS) that delivered 2000+ messages monthly.
- **Gratuity Management System** - Eliminated manual payout errors by integrating with Popote Payments platform for bulk transfers. Reduced payroll processing from a day to 4 hours.
- **Loan Management System** - Automated and compressed approval workflow from 3 days to 2 hours.

### Strathmore HP Research Centre (Clinton Health Access Initiative) | Junior Developer

July

2015 – May 2016

- Normalized 25+ MySQL tables hence cutting down query response time by 15%.
- Built dynamic questionnaires that reduced data entry errors by 10%.
- Collaborated on 9 feature releases using waterfall methodology within 3 weeks.

## Projects

---

### **Chatroom** | Git, MERN Stack (MongoDB, Express, React, Node.js)

- Built real-time chat app, tested with 4 concurrent users. Added Clerk authentication (Google and GitHub login) and deployed backend to Vercel.

### **Transaction Tracker** | Git, React Native, Appwrite

- Mobile app for personal expense tracking. Tracked family's transaction history.

### **Intelligent Meal Planner** | Git, React, Convex, Claude Code

- AI-powered meal planner that generates my personal weekly menus. Reduced meal planning time from 15 minutes to 8 minutes per week.

## Education and Certifications

---

### **Strathmore University, MSc Information Technology**

**May 2018 – December 2020**

Major: System Security and Forensics

Thesis: Built a prediction model (Python/pandas/scikit-learn) to help the Kenyan government allocate healthcare facilities based on population density.

### **Strathmore University, Bachelor of Business Information Technology** November 2012 – June 2016

Major: Database Administration

Final project: Quarantine Management System for viral human infectious disease tracking (PHP/MySQL)

### **Certifications**

- Certified Ethical Hacker (EC-Council) - 2017
- SAP Certified Application Associate (SAP Global) - 2016
